Sylvia Mahlangu · WIL Logbook

DENIS IT Department · Month 3: October 2026 · Developing technical knowledge

TASKBOARD

PRODUCT BACKLOG	IN PROGRESS	COMPLETED
• Present my ideas on DENIS in 5 years	• Network graph for the 5-year assignment • Assisting with network issues and call-centre agents	• Approvals, schedule, induction and training • Started hands-on support in month 2

WALKTHROUGH

1. What do we need to do to advance this piece of work?	Finish my network graph and my five-year assignment on DENIS.
3. What do we need to finish as a team?	The network graph and my explanation of the ideas.

LOGBOOK · OCTOBER 2026

Monday to Friday	**Date: October 2026**	
	1. What did I complete since the last standup?	• During October, I continued building on the knowledge gained during the previous months. I became more aware of how IT support contributes to the smooth running of the organisation. • My learning also started extending towards networking. I recognised the importance of understanding how computers and other devices communicate, how connectivity affects employees and why network reliability is important in a business environment. • I was given an assignment: where do we want to see DENIS in the next five years as technology takes over? My ideas: replace the slow system we use, let AI take over in a good way, and introduce robotics into the industry.
	Weekly reflection	This month encouraged me to become more interested in the technical side of IT. I realised that Application Development involves more than writing code. Understanding systems, networking, troubleshooting and the workplace environment is also important.

November	Date: November 2026	
	Current learning and reflection	As I continue with my workplace learning, I am focusing on improving my understanding of networking and the technical environment within DENIS. I want to strengthen my ability to investigate technical problems, understand how systems communicate and become more confident when assisting with IT-related tasks.
